

Camera Push Notifications

Before starting you will need to notify GreenLink Technologies Inc. as to which camera(s) you would like to send notifications.

Open your NVMS 7000 app

Click the menu button on the top left

Then Select "Alarm"
(fourth option down)

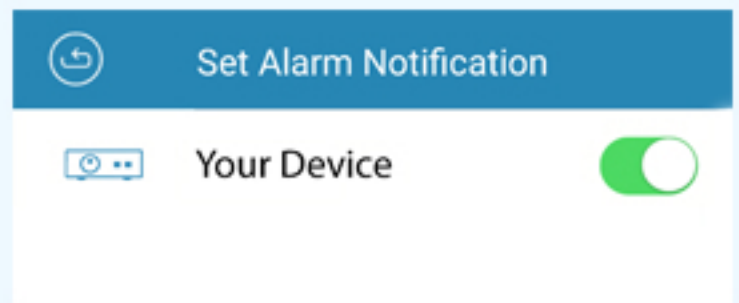

You will be brought to this screen

Then click "Set Alarm Notification"
at the bottom

You will see your device listed
on the next screen

Tap on the slider so it turns
green

Once the slider is green, you can click the back button

And then you may leave the NVMS app all together.

Any time your camera senses motion you will hear a notification chime and see the following icon at the top of your phone

If you click on the icon, it will take you to this screen

If you click on the icon to the right, a drop down of options will appear. Simply choose to start live view or engage in playback

Congratulations! You now have push notifications on your mobile device
