

# Total Connect 2.0

Navigate to your Google Play Store (Android Phones)

Or to your App Store (IPhones)

Download the Total Connect 2.0 app

(Looks like this)

Open the app

This is what you will see

Go ahead and enter your login information

The login screen of the Total Connect 2.0 app. It features a dark blue background with a lighter blue gradient. At the top, there are two white input fields for "Username" and "Password". Below these is a green "Login" button with a white arrow pointing right. To the left of the button is a house icon with a padlock. Below the login button is a language selection dropdown menu showing "English(United States)" with a small American flag icon and a downward arrow. At the bottom, there is a "Remember Me" toggle switch, which is currently turned on (green). Below the toggle is a link that says "Forgot Username or Password?".

Once you login, you will be brought to this screen

From here, you can arm your security system.

If we click on the more tab we can get to our security panel to view our zones

The icon looks like this

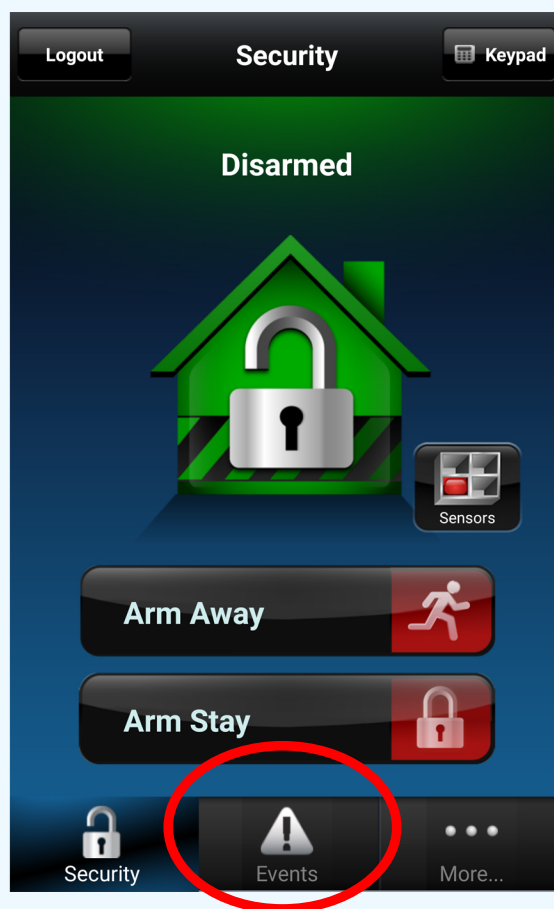

Once you've clicked that icon, you will be brought to this page.

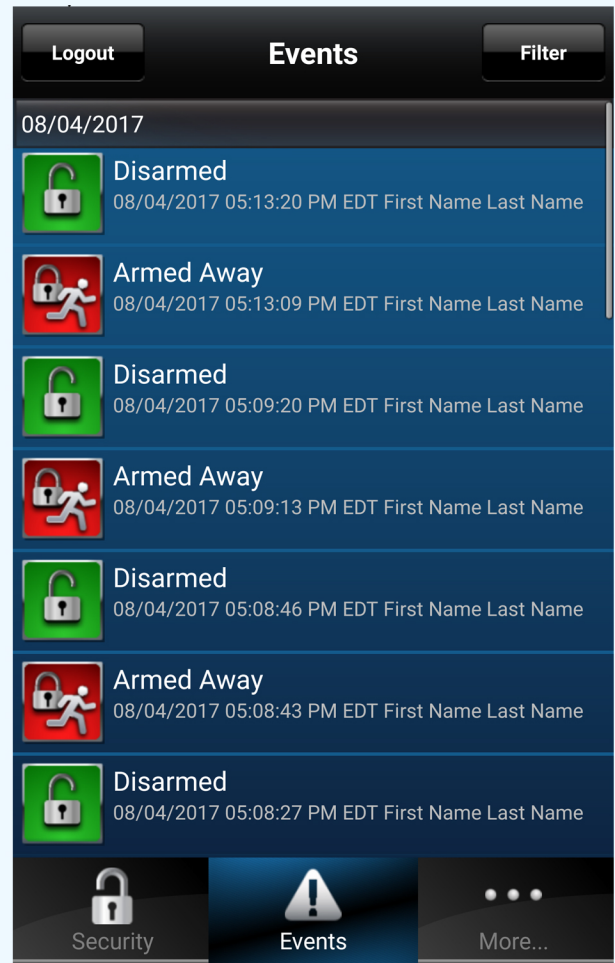

This page will display any faults you may have. In this example we have a fault at the "Guest 1 Door". This means that the door must be shut before the system can be armed.

If we navigate back to the homescreen and then click "Events" we can take a look at all of the alarms and events that our system has recorded

This page displays all of the events that have happened within your security panel. As we can see here, this panel has thankfully not recorded any alarms. It has however, recorded all of the times the alarm was set and disarmed.

This is pretty much all you will need to know within the Total Connect 2.0 app. If you need to know/learn how to add new users and user pin numbers please see the next PDF how to document on the topic.
